

# Children's Hospitals and Clinics of Minnesota - St. Paul, Minn.

## Exterior and Interior Signage, Wayfinding and Donor Recognition

This major hospital expansion project included the phased construction of a new five-story Specialty Care Center, parking garage, as well as a reconfigured and expanded main hospital building.

Our design team followed a four-phase design process to develop and implement a complete wayfinding system along with a new interior and exterior sign program. The playful design utilized child-friendly themes and bright colors to enhance the experience of the hospital's patients and their families.
